

The ACSI

The ACSI is the only national cross-industry measure of customer satisfaction in the United States. The ACSI was established in 1994 by researchers at University of Michigan’s Ross School of Business as a national indicator of the quality of economic output, as measured by US household consumption experience. Today, the ACSI tracks trends in customer satisfaction and provides benchmarking insights for companies, industry trade associations and government agencies. ACSI’s data utilizes the groundbreaking proprietary econometric models developed by Dr. Claes Fornell, the world’s leading authority on customer satisfaction, its measurement and analysis.

Customer Satisfaction

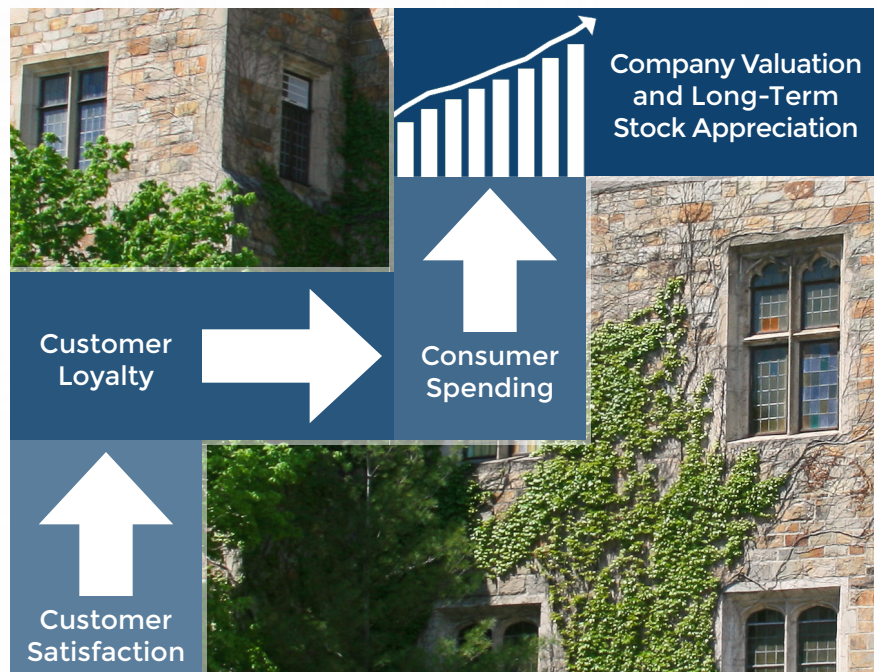

At the core of ACSI Funds’ investment thesis is the intuitive idea that companies whose customers are satisfied will outperform their peers over the long term. Decades of research by ACSI has shown that customer satisfaction can impact earnings, return on investments, return on assets and cash flows. When viewed as an off-balance-sheet asset, customer satisfaction impacts valuation and long term stock appreciation. In short, our research indicates that companies that treat their customers well produce better returns to investors.

Satisfaction Weighted Investing

The American Customer Satisfaction Core Alpha ETF (ticker: ACSI) tracks the American Customer Satisfaction Investable Index, which provides large cap US equity exposure to investors with individual companies weighted within each sector by their ACSI customer satisfaction scores. The index follows a systematic and transparent process to allocate across all sectors (within set tolerance levels) to deliver a satisfaction-weighted portfolio to investors.

Ticker	IIV (Intraday Ticker)	CUSIP	Fund Inception	Investment Style	Dividend Schedule	Index
ACSI	ACSI.IV	26922A776	Nov 1, 2016	US Large Cap Core	Annual	American Customer Satisfaction Investable Index

The American Customer Satisfaction Index ETF seeks to track the American Customer Satisfaction Investable Index (ACSIITR). The American Customer Satisfaction Investable Index utilizes proprietary customer satisfaction scores to weight stocks within each sector by their relative customer satisfaction scores. The index utilizes customer satisfaction metrics for over 350 brands, representing over 150 large capitalization securities for inclusion in the index. Sector constraints are applied at the time of index rebalance with the intention of providing a diversified portfolio across all US sectors. All securities within the index are listed on a major US stock exchange and measured by the American Customer Satisfaction Index.

An investor should consider the Fund’s investment objectives, risks, charges and expenses carefully before investing. The prospectus or summary prospectus contain this and other important information about the Fund(s) and are available at acsietf.com or by calling 734.882.2401. Please read the prospectus or summary prospectus carefully before investing.

Portfolio Strategy & Management

The American Customer Satisfaction Core Alpha ETF seeks to track the American Customer Satisfaction Investable Index, a broadly diversified U.S. equity index developed by ACSI Funds and ACSI, LLC.

Performance data quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the Funds may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by visiting www.acsietf.com.

Risks

The securities of large-capitalization companies may be relatively mature compared to smaller companies and therefore subject to slower growth during times of economic expansion. The Index relies heavily on proprietary quantitative models as well as information and data supplied by third parties (Models and Data). Because the Index is composed based on such Models and Data, when such Models and Data prove to be incorrect or incomplete, the Index and Fund may not perform as expected. As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times or may hold securities not included in the Index. Investments involve risk. Principal loss is possible. The Fund has the same risks as the underlying securities traded on the exchange through the day. Redemptions are limited and often commissions are charged on each trade, and ETFs may trade at a premium or discount to their net asset value. To the extent the Fund invests more heavily in particular sectors of the economy, the Fund's performance may be more sensitive to developments that significantly affect those sectors.

Shares of the American Customer Satisfaction Core Alpha ETF may be sold throughout the day on the exchange through any brokerage account. However, shares may only be redeemed directly from the Fund by Authorized Participants, in very large creation/redemption units. There can be no assurance that an active trading market for shares of an ETF will develop or be maintained. **Alpha** measures a portfolio's risk adjusted performance and represents the difference between a portfolio's actual performance and its expected performance given its level of risk as measured by beta. **Beta** is a means of measuring the volatility of a security or portfolio of securities in comparison with the market. Market price is the price at which shares in the ETF can be bought or sold on the exchanges during trading hours, while the net asset value (NAV) represents the value of each share's portion of the fund's underlying assets and cash at the end of the trading day.

The **S&P 500 Index** is a market capitalization-weighted index focused on the large-cap segment of the market. The index is comprised of 500 of the top companies in leading industries in the U.S. economy.

ACSI Funds, a registered investment adviser, serves as investment adviser to the American Customer Satisfaction Core Alpha ETF and is paid a fee for its services.

The American Customer Satisfaction Core Alpha ETF is distributed by Quasar Distributors, LLC.
